The criteria for us being able to vaccinate 12 to 17 yr olds is as follows:
You must not have had a positive Covid PCR result within 12 weeks of the 15th January. (This is different to adults where the rule is 28 days)
You must be:

- Aged 12 – 17 (not yet attained 18 years) on 8th January 2022
- Plus one of the following criteria also applies:
- This will be your 1st dose
 - If it's your 2nd dose 12 weeks has elapsed by 8th January since your 1st dose
 - If you are clinically vulnerable or live in a household with someone who is severely immunosuppressed the gap before the 2nd dose can be administered reduces to 8 weeks after the first dose

The 1st and 2nd doses are termed the primary course of vaccination. Some patients aged 12 -17yrs will already be eligible to receive a 3rd dose by 8th January, this is called either the booster or 3rd dose depending on your personal clinical situation.

To fulfil that eligibility 12 weeks must have elapsed since completing your primary course and one of the following criteria must apply to you:

- You are aged 16 or 17 years on 15th January
- You are aged 12 – 15 years and are clinically vulnerable
- You are aged 12 – 15 years and live in the same household as someone who is severely immunosuppressed.

Only book if you fulfil the above criteria and are able to take an appointment offered to you for Saturday 15th January.

Please do not call with enquiries about other available dates. At this moment in time there are no other options available.
